

Safety & Risk Management

TRAINING PROGRAM

What We Do:

At C & K Sales and Service, we view safety as a management function, with similar principles that apply to organized operations and production. Managed effectively, safety can improve operational efficiency, boost production, and reduce costs while improving the quality of the work environment for all employees.

Our team of Safety Professionals take the realistic approach to safety and risk management. We believe proactive initiatives, planning and education are key essentials of a successful safety culture.

We Offer These Features:

- Training works with both Construction and General Industries
- Safety Program Writing and Review
- Safety Consulting
- Accident Investigation
